## Aqua Wiper Blade GM Truck

Introduction of a new unique arm style on the 2014/15 GM full size trucks (Sierra/Silverado) will cause interference issues on the Valvoline Aqua Beam blades. The pictures to the left show how the Aqua beam blade will look when installed on these vehicles. Installation on these vehicles will limit articulation due to contact with the wipers base, and can result in poor wipe quality performance and “missed” portions of the windshield.

Application laminate will specify 22OE for these applications.
