
Subject: Valvoline VO-113
Ref: Size difference for unit pack and bulk pack VO-113

Please be advised that there are two varying sizes of VO-113 in the marketplace. The individually boxed VO-113 filter is taller in height than the bulk pack version. While the height difference is evident, the two filters function the same. Both filters are identical aside from the height difference and can be used without hesitation. Please see photos below for reference.

The taller version will be replaced with the shorter version to avoid further confusion and to account for any issues related to clearance when performing an installation.

VO-113 (Taller Version)

VO-113 (Shorter Version)
