Subject: Consolidation of select filter models

Ref: VO-1 and VO-95

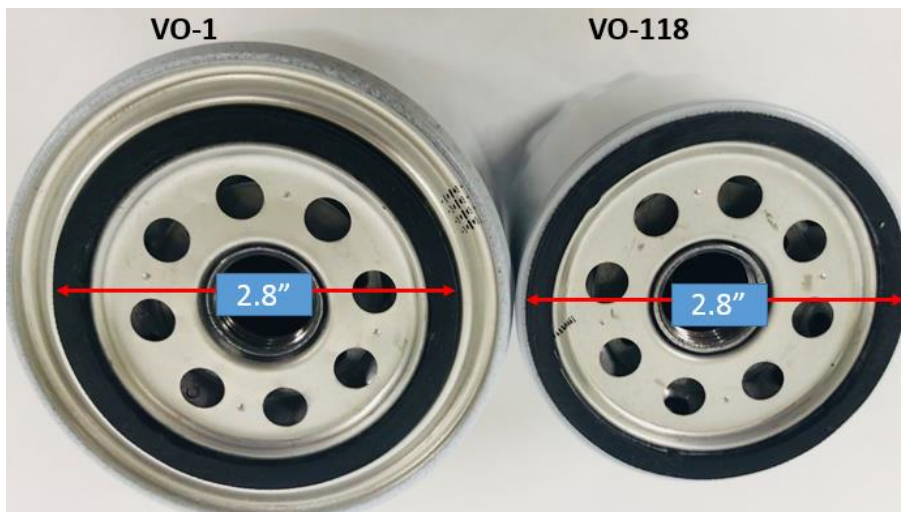

In response to the ever-evolving changes by vehicle manufacturers along with Valvoline's desire to provide the best service possible to our customers, consolidations of two filters are being conducted.

- VO-1 to VO-118
- VO-95 to VO-25

VO-1 and VO-95 are of a larger size design that has not been employed by the vehicle manufacturers for many model years. These filters are being replaced by a smaller design that mimics the form and function of its predecessor.

The following tables illustrate the dimensional differences from current filter (left side of table) to the consolidation (right side of table). However, please note, there is no change to performance for all vehicles covered by these filters.

	VO-1	VO-118
Height	4.6"	4.4"
Diameter	3.6"	3.0"
Threads	¾-16 OE oversize	¾-16 OE oversize
Gasket OD	2.8"	2.8"
Valves: bypass/anti-drain back	Yes/Yes	Yes/Yes

	VO-95	VO-25
Height	3.1"	3.0"
Diameter	3.6"	3.0"
Threads	¾-16 OE oversize	¾-16 OE oversize
Gasket OD	2.7"	2.7"
Valves: by-pass/anti-drain back	Yes/Yes	Yes/Yes
