

Subject: Valvoline Cartridge filter VO-98

Ref: GM 1.4L – 1.8L Engine Oil Cartridges – Vehicles with HENGST or UFI Oil Filter Adapters

GM Vehicles with 1.4L-1.8L engines may come from the factory with one of two oil filter adapters (OFA). These two adapters are almost identical in outward appearance with the exception of the vendor name on the cast aluminum housings and the injection molded nylon caps. They DO NOT use the same cartridge filters. See Photos below.

HENGST Housing and Filter Cartridge

UFI Housing and Filter Cartridge

The most common OFA is manufactured by and has the name HENGST in raised letters on the cast aluminum housing and nylon cap. These OFA's use the ACDelco PF2257G / Valvoline VO-98 cartridge.

The other OFA housing is made by UFI as identified on the housing and cap. The UFI housing uses ACDelco PF2263G / Valvoline TBD. (Release date pending).

The filters required for these two adapters are NOT interchangeable.

The Valvoline e-catalog has been updated. The 2016 printed catalog and all prior Valvoline printed catalogs do not reflect the adapter options for the vehicles below.
